

Multifunctional Asphalt Concrete Paver

SRP09-C5 MA

Multifunctional Asphalt Concrete Paver

- ▶ Engine model: SC9DF290.1G3
- ▶ Rated power: 213/2000kW/rpm
- ▶ Gross weight/maximum operating weight: 23/30t

Product features

SRP09-C5 MA multifunctional paver is professional equipment used in asphalt concrete surface and base stabilized material paving of highway and other types of road. It is driven by hydraulic force and controlled by microcomputer; screed plate adopts double vibrating and eccentric vibratory compaction technology; material level adopts ultrasonic sensing control technology. This makes the paver have advantage of good paving stability, even material separating and feeding, high prepressing density, smooth surface and easy to operate. Therefore the SRP09-C5 MA paver is an ideal construction machine for base and surface paving projects and it offers superior paving performance to maximize productivity while providing exceptional reliability.

SRP09-C5 MA

Technical specifications:

SRP09-C5 MA

Item		Unit	Basic parameters
Basic paving width		m	2.5
Max. paving width			9.5
Max. paving thickness		mm	500
Paving speed		m/min	0-25
Traveling speed		Km/h	0-3
Hopper capacity		t	16
Theoretical productivity		t/h	1000
Camber adjustment		%	-1-+3%
Gradeability		%	20
Longitudinal evenness		mm/3m	<2
Cross slope error		%	±0.02
Compactedness inhomogeneity		%	<5
Lubricating type			Central lubrication
Heating type			Gas heating type
Diesel engine	Model		SC9DF290.1G3
	Power /RPM		KW/r/min 213/2000
Screed	Vibration speed		0-1470
	Vibration travel	Main	4
		Assist	4
Vibration frequency		Hz	0-50
Vehicle weight	Total weight		23
	Weight at max. working status		30
Overall dimension LxBxH		mm	7000×9500×3950
Transportation dimension LxBxH			7000×3000×3300
